Question 9.3.3 There are 5 % defective items in a large bulk of items. What is the probability that a sample of 10 items will include not more than one defective item?

## **Solution:**

Let X be a bernoulli random variable with parameters n, and p with values

$$p = \frac{5}{100} \tag{1}$$

$$=0.05$$

$$n = 10 \tag{3}$$

CDF of X is given by

Random Variable	Value	Description
X	0	Defective
	1	Not Defective

TABLE 1: Random variable

$$F_X(n) = \Pr\left(X \le n\right) \tag{4}$$

$$=\sum_{k=0}^{n} {^{n}C_{k}p^{k}(1-p)^{n-k}}$$
(5)

Since, n=1

$$\implies F_X(1) = \Pr(X = 0) + \Pr(X = 1) \tag{6}$$

$$= \sum_{k=0}^{1} {}^{1}C_{k} (0.05)^{k} (0.95)^{1-k}$$
 (7)

$$= 0.9138$$
 (8)
